Work Experience

VERZEO

Intern

Apr 2021 – May 2021

- In this internship, I developed my knowledge of web development.
- using multiple languages and some frameworks like **React**, I have made some of my own websites.
- Some of the projects are MUSIC APP and LANDING PAGES.

Projects

Clash of Clans Theme NIT-N map

May 2022 – Jun 2022

- The map is developed using **Google javaScript Map API**
- By default, the location is set to the college NIT-N
- The map has themed by the idea of the **game Clash of Clans**
- this website was built using Google cloud Services and Javascript

Konnect-Friends

Jun 2022 – Present

- Sharing of files/data has never been this easier
- This project was developed for sharing of data between two devices.
- This web app has been developed using **HTML FETCH API**.
- Just drag and drop files and voila get the files through **EMAIL** and download them

Weather Forecast App

Oct 2021 – Nov 2021

- The project is based on current weather in your current location or any location of your choice.
- the website can predict up to 7days of weather predictions using-
Weather API

Extra Curricular

Cybersecurity Virtual Internship

28 Jun 2022

SAP USA

learned a whole lot of new things, what and why about cybersecurity. this program has given me knowledge/experience on how the work will be done in real-time.

Ethical Hacking Workshop

7 Sep 2019

IIT-Guwahati

It's a 3 days workshop on Ethical Hacking.
